

GitHub not connecting to Colaboratory

If you connect your GitHub to Google Colab but when you go to “Save a copy in GitHub” it looks like this:

Note that under “Branch” it says “No branches.”

In that case, go back to your GitHub repository and upload a file. You can use the plotting template for this, all that matters is that a file (.ipynb) is uploaded to your repository.

Once you’ve done that, your repository will have a default branch titled “main.”

You can delete the file you manually uploaded and the “main” branch will still be there.

Then, when you go to save from Colab (you may need to refresh the page), it will look like this:
